Made in the USA
Enough said.

ASTM F2892
The new official standard for soft toe protective footwear in the United States. (Non-Safety/Non-Protective Toe)

Composite Toe
A toe cap made from a non-ferrous elastomeric material, which is light weight and will not conduct heat, cold or electricity. Composite toes meet or exceed the ASTM F2413 Standard for protective footwear.

Soft Toe
Non-protective toe cap.

XTR® Brand Composite Toe Cap
The XTR® Brand composite toe cap provides extra toe room and comfort; is lightweight, strong as steel and will not conduct heat, cold or electricity. This XTR® Brand composite toe cap meets or exceeds the ASTM F2413 standard for protective footwear.

Electrical Hazard
Safety footwear that provides workers a secondary source of protection from live circuits, wires or highly charged electrical equipment. The insulating properties of such footwear are measured under dry conditions and may deteriorate in wet environments and with wear.

Slip Resistant
Soles designed to provide a higher level of coefficient of friction with the walking surface to improve slip resistance.

Waterproof
A combination of water resistant materials and construction which helps protect the foot from getting wet in environments where excess water is present.

Quick-Access Side Zipper
Offers the convenience of a slip-on shoe in a 6"-8" military boot. In / out: 5 seconds per boot! Does not bind up in sand.

Metal Free
This Reebok footwear is metal free. It is ideal for jobs that require working around sensitive metal detectors.

Airport Friendly
While this Reebok footwear contains some metal hardware, it will not activate most airport metal scanning devices.

The Foot Force® F2A Athletic Insole
A soft molded dual density polyurethane removable insole that cushions and cradles your foot, provides additional shock absorbing polyurethane ball and heel pads and a moisture absorbing fabric covering.

The FootFuel® Insole
Footbed technology engineered to deliver higher levels of control, comfort and energy return. Developed for high performance footwear, FootFuel™ responds on impact, absorbing shock and supporting your foot. On lift off, FootFuel™ polymers expand launching your foot with every step. FootFuel™ retains its cushioning and rebound properties for the life of the shoe - so you never run out of fuel. With just the right amount of cushioning, FootFuel™ provides both comfort and stability for a unique fit and explosive performance.

Total Cushioning Technology™
Provides five layers (1-1/2") of cushioning under the heel and three layers (1/2") under the forepart: deeper, total cushioning for amazing comfort and impact protection.

Anti-Microbial Shield
An anti-microbial moisture wicking lining that provides protection against odor, staining and deterioration caused by bacteria, fungus and other microorganisms.

TAA Compliant
Manufactured in a country listed in the Trade Agreements Act. GSA schedule compliant.
